**RE: Letter of Support for Lakeshore Trout Unlimited Grant**

To whom it concerns,

It is my pleasure to write this letter of support for grant money being requested by the LakeShore Chapter of Trout Unlimited.

For many years Lakeshore TU has had an enormous impact on the restoration and improvement of Wisconsin coldwater resources. Their Facebook page and the Wisconsin Department of Natural Resources website will demonstrate how Lakeshore TU's volunteers, partnerships and funding has greatly improved the quality of their area waterways including the Onion River, Nichols Creek and more. The Onion River and Nichols Creek are class 1 Wisconsin trout waters.

Both the Lakeshore Chapter of Trout Unlimited and our organization, Green Bay Trout Unlimited (GBTU), share a common mission to conserve, protect, restore and reconnect North America's coldwater fisheries and their watersheds. The Lakeshore Chapter has demonstrated how they use donations and grants to achieve this goal. GBTU's members have contributed to the Lakeshore Chapter's projects through volunteering hours and donations. The state of Wisconsin has benefited recreationally, environmentally and financially from their work.

For the reasons listed above and more GBTU proudly supports grant money requests by the Lakeshore Chapter of Trout Unlimited.

Thank You,

Adrian Meseberg

President, Green Bay Trout Unlimited
