

Short Summary:

GBTU Assistant Professor, Michael Holly, emailed informing GBTU that he was writing a proposal to investigate PFAS concentrations in Green Bay and in particular the biomagnification of PFAS from sediment to sportfish. He asked if GBTU would be willing to draft a letter of support to Sea Grant for the study? He attached a draft of the proposal for our review. Professor Holly was a guest speaker of ours in 2020 on the topic of PFAS.

ONLINE VOTE (Tuesday, April 13th, 2021) - Should Green Bay Trout Unlimited sign on to this letter of support for Mike Holly regarding PFAS's ?
